

584596002 - SENSARMOUR (S) PROTEZIONE SENSORE

Fuel sensor access protection armor. Sensarmour is dedicated to protecting the fuel sensor opening of the tank on heavy vehicles, from unauthorized access. It's designed to be fitted quickly and without the need for additional hardware or modifications: it's simply held in place by the existing tank retention straps. Once Sensarmour is installed it is no longer possible to access the fuel inside the tank through the fuel sensor opening or fuel lines. Sensarmour is made of 3mm gauge aluminium with multiple longitudinal bends to ensure maximum strength and rigidity against deliberate damage. The smart telescopic geometry ensures that two single sizes fit the vast majority of installation conditions eliminating the need to cut and/or bend sheet aluminium or steel parts during installation. The result therefore proves secure, neat and unambiguously effective. Sensarmour must be installed on an empty tank, making sure the tank is secured by other temporary means when loosening the rete

TECHNICAL DATA

Main Body Material	Aluminium
Weight	1405 g
Package type	Carton Box
Package contents	1 pc in carton box
